DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because it includes language that can be implied. On line 1, delete "This invention relates to a" and insert therefore --A--. Correction is required. See MPEP § 608.01(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Art Unit: 3671

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

3. The disclosure is objected to because of the following informalities: omitted section headings. Appropriate correction is required.

Claim Objections

4. Claims 7, 9 and 15 are objected to because of the following informalities: non-idiomatic English.

In claim 7 on line 1, change "characterised" to --characterized--.

In claim 9 on line 3, change "metres" to --meters--.

In claim 15 on line 3, delete "with" or make an equivalent change thereto.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 6 and 17 through 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "the pile sleeve" on lines 1 through 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 17 recites the limitation "the pile sleeve parts" on line 7. There is insufficient antecedent basis for this limitation in the claim. Claim 21 is similarly rejected.

Claim 19 recites the limitation "the structural group" on lines 1 through 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 17, 18 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by EPO Patent Application No. 0 984 105 A1.

EPO '105 discloses a method of assembling a pile driving device comprising the steps of:

with regard to claim 17,

setting the an impact hood (306) on an assembly block (336);

disposing a pile sleeve (330) around the assembly block and the impact hood; and

connecting flanges (320) of the pile sleeve together;

with regard to claim 18,

the device further comprising a hammer foot (312) and a hammer housing (308), and wherein the hammer foot, impact body and hammer housing are pre-assembled into a structural group and are fixedly connected to the impact hood; and

with regard to claim 21,

wherein pile sleeve is pressure tight.

Art Unit: 3671

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over EPO Patent Application No. 0 984 105 A1.

EPO '105 teaches all of the features of the claimed invention with the exception(s) of:

with regard to claim 19,

an adapter ring; and

with regard to claim 20,

the step of initially setting the impact hood on an adapter plate.

With regard to claims 19 and 20, it would have been obvious to one having ordinary skill in the art of pile driving at the time of invention to modify the method disclosed by EPO '105 such that it would include the step of initially setting the impact hood on an adapter plate to facilitate use of the device on piles of varying dimension.

Allowable Subject Matter

11. Claims 1 through 5, 8, 10 through 14 and 16 are allowed.

12. Claim 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

13. Claims 7, 9 and 15 would be allowable if amended or rewritten to overcome the objections for minor informalities set forth in the above Office action.

Conclusion

14. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
